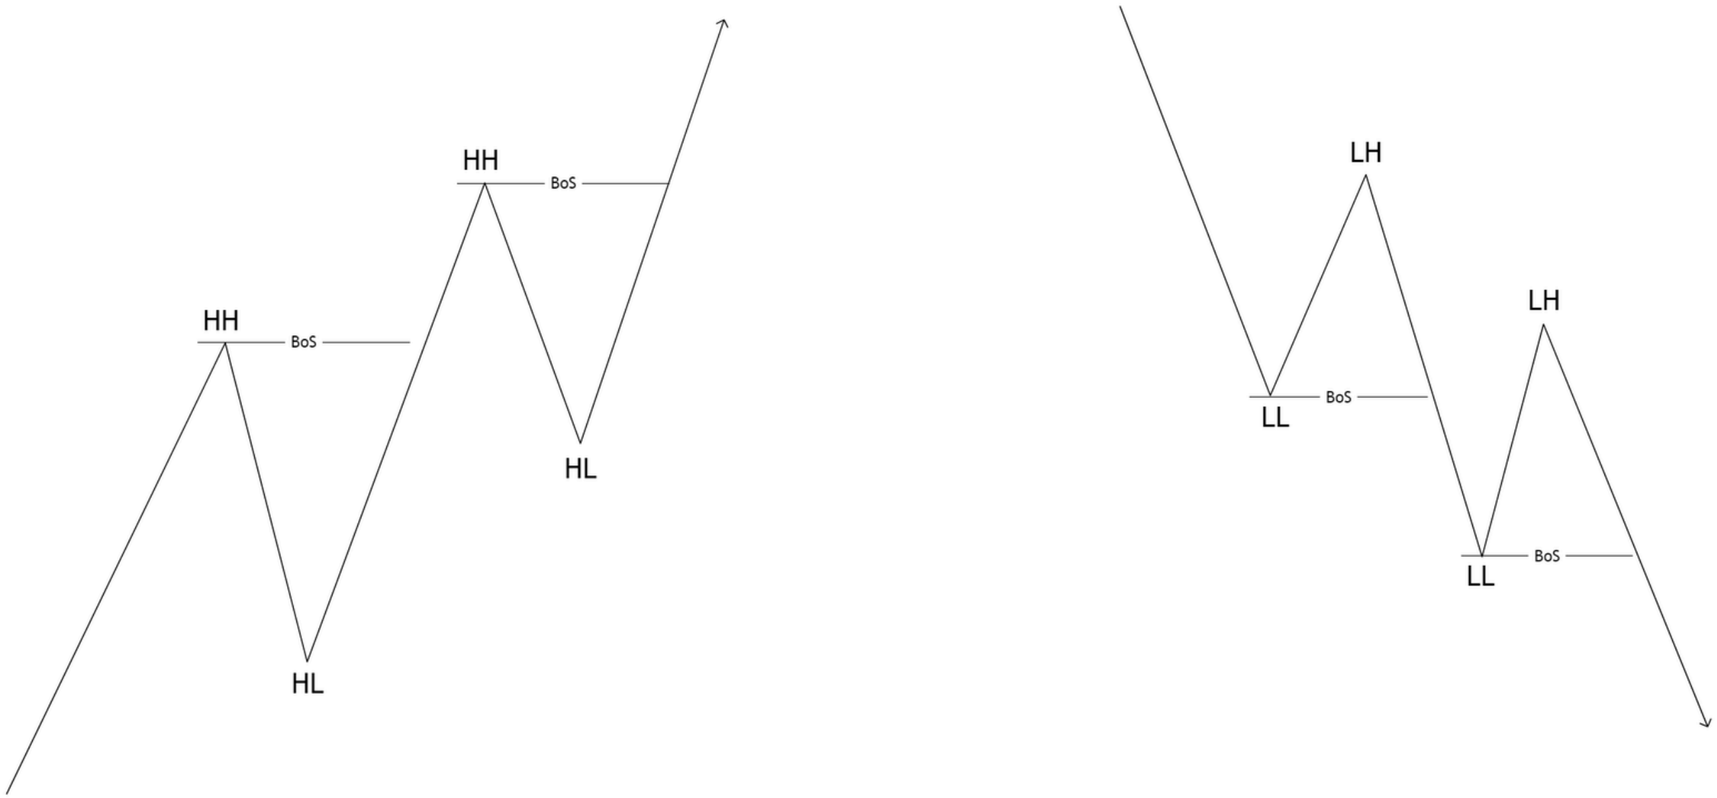
KWON'S TRADING BIBLE

By Kwon Yoo

CHAPTER 1
WHAT IS A STRUCTURE?

kwonyoo published on TradingView.com, Jun 13, 2025 20:38 UTC-4

Market moves in two directions.
Longs and Shorts or Bullish or Bearish.
Once BOS (Break of Structure) forms, it either creates new HH (Higher High) or LL (Lower Low) and confirms the HL (Higher Low) and LH (Lower High).



kwonyoo published on TradingView.com, Jun 13, 2025 20:42 UTC-4

Rerversal happens when it fails when new high was formed but HL gets broken for bearish reversals and vice versa for bulligh reversals

CHAPTER 2
WHAT IS A LIQUIDITY?

LIQUIDITY

By my definition it is left over orders where market has to come back to fill the orders
Ex. Institution A has buy orders but market dipped due to Institution B which had greater order and A starts averaging down to reduce loss and therefore, market starts climbing back again.

EQH / EQL

Tokyo
EQ High
EQ Low
EQH (Equal Highs) or EQL (Equal Lows)
Weak liquidity which tends to clear asap or within few hours but can be targeted as TPs

NO WICK CANDLE

VOLUME GAPS

kwonyoo created with TradingView.com, Oct 11, 2026 12:49 UTC-4
Micro E-mini Nasdaq-100 Index Futures · 3 · CME −5.50 (−0.02%)
Volume Gaps often happens during no volume sessions like Asia, in between Asia - London, and London sessions
They show great reversal areas to scalp, entry for reversals
